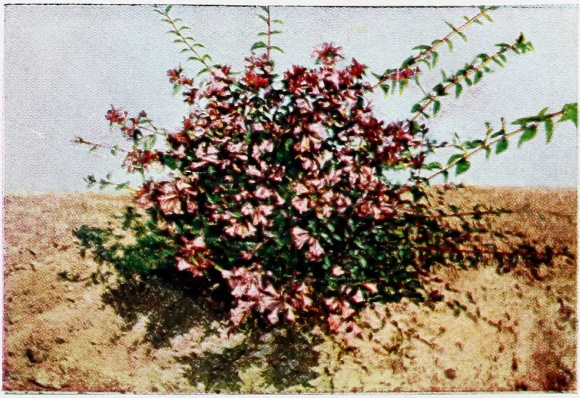
BLUEBERRIES. Both ornamental and delicious. Should be a part of every home planting. Moist, acid soil is a requirement. **See following page.**



ABELIA, EDWARD GOUCHER. A very attractive shrub with glossy, semi-evergreen foliage and plentiful pinkish white flowers all summer. Makes a fine dwarf hedge. **See page 3.**

You Should Sell

BLUEBERRIES

Easy To Handle. Good Profits.

Cultivated Blueberries are hardy shrubs of rare beauty; they are doubly valuable because they are fruitful and ornamental throughout the entire year.

Just loads of delicious berries.

There has developed an enormous demand for these plants especially for fruit. If you have not been getting some of this trade you are missing some good profits. They are easy to grow and handle. Put in a small stock and let us supply you; we will send to you or direct to your customers under your tags.

Prices of Blueberry Plants	Each	10	100
6 to 12 in., 2 yr.	$0 40	$3 00	$25 00

2 to 3 ft., 3 yr. & 4 yr.	75	6 00	50 00

Prices on larger plants or greater quantities quoted on application.

CABOT. A very early variety. Plants seldom exceed 3 feet in height and make a broad low bush. The color of the new growth in winter is a light red over olive. The large berries have a delicious subacid flavor.

CONCORD. The bush is of upright habit and at maturity exceeds 6 feet in height. The young growth is bright red in winter. The berries are large, frequently reaching three-quarters of an inch in diameter. They usually ripen a few days earlier than Rubel and are very fine in flavor.

JERSEY. The bush is of vigorous habit and grows very large. The winter color of the young growth is a light red over golden brown. The berries are among the very largest, light blue, and ripen about the same time as Rubel.

JUNE. A little earlier than Cabot. Berry is large, of medium blue color, sweet and delicious when fully ripe, with a slight subacidity. Newer and probably better than Cabot.

PIONEER. A very fine variety ripening about one week later than Cabot. The bushes are stocky, seldom exceeding 4 feet in height, with a tendency to be broad rather than high. Its stems are stout and stiff, and the winter color of the new growth is a delightful red. Pioneer produces heavy crops of berries close set in the cluster. They are larger than Rubel, of a medium blue color and fine flavor.

RANCOCAS. The bush of slender, vigorous, upright habit rarely surpasses 5 feet in height. The winter twigs are dark red. The berries are somewhat larger than those of Rubel and begin to ripen several days earlier.

RUBEL. A vigorous, productive variety. Well-developed bushes stand 6 feet high and the winter color of the young wood is a rich red. The large berries of fine color are usually ready to pick the first week in July.

Cuprinol Stops and Prevents Rust

Wood, fabric, and rope don't just rot, they're eaten up by living fungi, termites and borers. Cuprinol puts a stop to it, by an unusual principle of wood and fabric preservation. Originated abroad, Cuprinol has long been used by leading florists and nurserymen of Denmark, England and other European countries. Cuprinol is surface applied—by paint brush, dipping, spray gun or swab. Cuprinol-treated material is non-poisonous to higher forms of animal and plant life. Exhaustive tests have proved that Cuprinol-treated wood and fabric is non-toxic to seedlings and plants in any stage of growth.

The manufacturers of Cuprinol say the wood will last three times as long as when untreated. Get a supply and see just what it will do. "When Cuprinol goes in rot stays out."

1-gal. cans at $3.45 per gal.; 5-gal. pail at $3.35 per gal.; 50-gal. drums at $3.10 per gal.

Business Information

THESE PRICES are in effect for Fall 1948—Spring 1949 season.

PRICES named in this Trade List apply only to orders placed by nurserymen, florists and dealers.

PACKING. All goods are packed in boxes and bales for which we charge sufficient to cover cost of material used. We will add this cost to your invoice. This cost applies whether you remit with order or buy on time terms.

CLAIMS, if any, must be made immediately upon receipt of goods, and if just, made satisfactory, but in no case are we responsible for more than the purchase price of the stock in question. We will not be responsible for failure to fill orders in full or for any damage or delay to stock after delivery to the transportation company.

TERMS. We offer the usual terms: net 30 days from date of shipment to those of known responsibility but must have satisfactory business references from others or remittance must accompany order. Those desiring stock shipped C.O.D. will please remit one-fourth the amount of their purchase when ordering. Other terms by special arrangement.

NON-WARRANTY. We give no warranty, expressed or implied, the purchaser assuming all risk and responsibility of transportation, growth, planting, life of stock or any other matter on any stock we sell. We send out good stock, carefully grown and packed but cannot control conditions after it leaves our care. We exercise the greatest care to keep our stock true to name and are willing to replace on proper proof any stock that may prove otherwise, or refund the amount paid us for such stock, but it is mutually agreed that we shall not at any time be liable for any greater amount.

TELL US HOW TO SHIP, whether by express, motor truck or railroad freight. If by motor truck or railroad freight, tell us the route or over which line you want delivery made. If you do not give this information we will use our own judgment as to route and methods to use. It is mutually agreed that whether you name the route or you leave it to our own selection, we will not in any way be responsible for time or condition of delivery and our responsibility ceases upon our delivery to the transportation company.

HARDINESS OF PLANTS. When hardiness of plants is mentioned herein it applies only to this section.

TIME OF SHIPMENT. We ship most every week in the year with the possible exception of during the winter when bad weather makes it impossible, although this is very seldom. Of course, there is a regular season for shipping the different plants, but if you want them out of season and are willing to take the risk of good delivery, we will pack with the utmost care and get them off to you at most any time you want them.

Plan to Visit Our Nursery

We will certainly be glad to have you come to see our stock for yourself. We believe you will find it compares favorably with that grown by other nurseries. Some of our customers have told us it is better than is furnished by some others. We are on the Eastern Shore of Maryland, 100 miles south of Wilmington, Del., 100 miles from Cape Charles, Va., 90 miles from Annapolis, Md., via Matapeake ferry, 150 miles from Baltimore, Md., via Elkton, Md., 225 miles from New York, N. Y. We hope you can come to see our stock. It is good driving on the famous Eastern Shore.

ORNAMENTAL STOCK

AUNT MARY'S SWEET CORN

THE SWEET CORN SUPREME

This is the most wonderful Sweet Corn we have ever grown. One grower describes it as "the best Sweet Corn in the world."

Has the most delicious flavor and keeps a long time before becoming too hard to use. In fact, usually requires artificial heat to cure it for seed purposes.

Aunt Mary's Corn, by its excellent quality, sweetness, and flavor makes a stronger appeal to the Corn-loving public than most any other variety and that appeal continues long after you are tired of other Sweet Corns.

Liberal size packets, 35c each; 3 for $1.00, postpaid.

If after growing this wonderful Sweet Corn you are not entirely satisfied, we will refund every cent you paid us for it.

AZALEAS

Varieties with an asterisk (*) are the hose-in-hose or double type. Each X means one transplanting.

AZALEA ROOTED CUTTINGS

We will have to offer this season rooted cuttings of the following varieties of Azaleas at $5.50 per 100 of a kind, $45.00 per 1000. Not less than 250 of a kind at the 1000 rate. Amoena, Bridesmaid, Coral Bells, Flame, Hinodegiri, J. T. Lovett, Pink Pearl, Salmon Beauty, Snow, Sweet Brier and many others. If others are wanted, ask for list and prices, or send list of varieties wanted for prices.

KURUME AZALEAS

The Kurume Azaleas are one of the most showy of all flowers for the garden They are also well adapted to forcing—thousands of them being sold for Easter, Mother's Day and Decoration Day. They are comparatively easy to grow and make such a wonderful display that the demand is constantly increasing. Many of the varieties are hardy out-of-doors as far north as Long Island. They are extremely floriferous, and in season the blossoms completely cover the plants. The colors are almost every hue and shade except yellow, as you will find below.

GABLE'S HARDIER AZALEAS

As many of you know, we have been growing and recommending these Gable Hardier Azaleas for several years, and the more they are known the bigger the demand for them.

Mr. Gable has constantly had in mind a hardier type of Azalea with a much wider color-range than has heretofore been possible to secure. He has had wonderful success in his efforts. We have been keeping in touch and working closely with him and are much pleased that we can offer the following varieties. We will have several new varieties of these to offer next season.

	Each	10	100	1000

ALUMINUM SULPHATE

Azaleas, Rhododendrons, Blueberries, Cornus florida, Heather, Kalmia and many other plants require an acid soil. Acid-forming organic matter, such as well-rotted oak leaves helps to increase acidity. Aluminum Sulphate is a good chemical for increasing soil acidity by using ¼ to ½ pound per square yard. Also used for turning hydrangeas blue. 10 lbs. $1.50; 50 lbs. $4.50; 100 lbs. $7.50

U. S. D. A. AZALEAS

Some years ago the U. S. Dept. of Agriculture introduced a collection of Azaleas mostly from Japan. We have been growing these Azaleas many years and have selected the following varieties as the best ones in this collection. They are well worth trying.

	Each	10	100	1000

"AZALEAS AND CAMELLIAS" by H. H. HUME

Interest in Azaleas and Rhododendrons is greatly increasing. Until now, little information on varieties, care and culture of these plants has been available. Mr. Hume accurately and thoroughly describes the varieties best suited for various uses and discusses questions on culture, such as soils, fertilization, planting, propagating, and general care, indoors and out. He has taken special care to describe accurately the several groups of Azaleas and Camellias, and his suggestions on the use and culture are very practical. If you are growing Azaleas and Rhododendrons you will find this book much help. While the book is entitled "Azaleas and Camellias" it applies equally to Rhododendron culture. Price $1.75, postpaid. See Hume's new book page 11.

GLENN DALE HYBRID AZALEAS

The Division of Plant Exploration and Introduction at the Glenn Dale Plant Station introduced, in 1941, a group of selected seedlings from their own crosses. We have been growing and propagating these plants since then and we are now offering them to the trade.

These plants are most interesting. The flowers run to over 3-inches across and include both self-colored and variegated. The plants are mostly excellent growers and do well here, and from all appearances will grow well in much colder sections. We hope to know more about this soon.

We only have a small quantity of some varieties, but hope to get all varieties distributed in as large an area as possible so we may have information as to how they grow generally throughout the country. If you get some of these we will appreciate knowing how they grow with you. We suggest you give these a trial.

Prices: *2 in. pot-plants, $2.50 for 10 of a variety; $20.00 per 100.
1 yr. field beds XX trans, $3.50 for 10 of a variety; $30.00 per 100.
2 yr. field beds XX trans., $4.50 for 10 of a variety; $40.00 per 100.
Not less than 25 of a variety at the 100 price.

ANCHORITE (No. 141900). Late. Medium height; rather spreading. 2-inch rose-colored flowers with an undertone of orange.

APHRODITE (No. 141898). Rose-pink. Midseason.

BUCCANEER (No. 141903). Midseason. Medium height; rather spreading. Brilliant red, but with darker blotch than Tanager. Sunburns in full sun.

CAPRICE (No. 141792). Midseason. Moderate height; upright habit. White flowers rayed and flaked with coral-red.

CARMEL (No. 141776). Early. Tall; single, 2-inch, spinel-red flowers with blotch of Indian-red dots.

DAYSPRING (No. 141780). Early. Erect growth. Flowers like large Kurume's; single; center white shading imperceptibly to clear pale pink.

DIMITY (No. 141766). Early. Tall bush to 6 feet. White flowers flaked and striped with brick red.

FANTASY (No. 141775). Early. Medium height; rather spreading. 2-inch white flowers broadly rayed and striped with dull red; occasional red flower.

FASHION (No. 141788). Salmon-pink, hose-in-hose.

GAIETY (No. 141910). Late. Medium height; rather spreading. Bright clear pink, with rather heavy blotch of deep rose-red.

GLAMOUR (No. 141908). Late. Medium height; rather spreading. Very brilliant rose-red.

GREETING (No. 141901). Midseason. Medium height; rather spreading; very floriferous. Coral-rose, edges of lobes somewhat wavy.

JOYA (No. 141905). Late. Medium height; habit like mucronatum. A brilliant rose-pink; large flowered.

JUBILANT (No. 141781). Midseason. Moderate height; spreading habit. Striking hose-in-hose, salmon-pink flowers.

MAYFLOWER (No. 141793). Light, salmon-pink; hose-in-hose.

MINUET (No. 141772). Early. Tall, erect growth. 1½ to 2 inch white flowers flaked with magenta.

PICADOR (No. 141899). Midseason. Moderate height; rather spreading. Brilliant orange-red; sunburns if planted in full exposure to light.

PIXIE (No. 141777). Early. Medium tall. Smallish starry flowers with revolute lobes; white ground with a central ray of spinel-red; blotch on upper lobe spinel-red.

REVERY (No. 141902). Late. Medium height; rather spreading mucronatum type (indica alba), but flowers very nearly circular in outline. Pale rose, no blotch.

SAMITE (No. 141791). Late. White, hose-in-hose.

STARDUST (No. 141771). Midseason. Erect growth; for all practical purposes a late white Kaempferi.

TANAGER (No. 141907). Late. Large, fushine-pink flowers with darker spots.

NO. 141783. Late. Bright salmon to coppery old-rose with darker markings. Very attractive.

NO. 141797. Late. Very large. Radiant red to deep rose with deep markings.

EMBOSSED ZINC LABELS

We will make from your list of varieties, Embossed Zinc Labels, ½ inch wide at 7c each in any quantity desired. These Labels will permanently identify your plants.

KAEMPFERI HYBRID AZALEAS

In these new Kaempferi Hybrids—the result of crossing Kaempferi and Malvatica—there has been obtained the hardiest type of evergreen Azalea, with a good range of form and color in the flowers so far achieved. Several years' tests have demonstrated that these new Hybrids are just as hardy as Kaempferi, until now the hardiest of the evergreen sorts. In connection with these Hybrids we suggest you try out the new Gable varieties we are offering.

AZALEAS—Kinds and Culture

By H. Harold Hume

A comprehensive new guide to this important family of flowering shrubs, written by the author of **Camellias in America.** Covers both deciduous and persistent-leaved Azaleas, their botany, history, and adaptability, as well as propagating methods, planting operations, culture outdoors and in greenhouses, and landscape use.

This is a volume that should be in the possession of all lovers of fine gardens, and especially those concerned with Azalea culture.

Price, $3.75 postpaid

MISCELLANEOUS AZALEAS

In the following list of Azaleas you will find many species; they are not classified or separated as to their different species. We are trying to give such descriptions that you may know, or have a general idea what each variety is like.

2-yr. seedling Azaleas are not as large as our 2-year Azaleas grown from cuttings.

	Each	10	100	1000
CALENDULACEA. The flaming color of the flowers is unequalled by any other spring flowering plant. The colors run from light salmon to deep golden orange and scarlet and usually appear before the foliage is fully developed, the latter part of May or early June.

ALUMINUM SULPHATE

Azaleas, Rhododendrons, Blueberries, Cornus Florida, Heather, Kalmia and many other plants require an acid soil. Acid-forming organic matter, such as well rotted oak leaves helps to increase acidity. Aluminum Sulphate is a good chemical for increasing soil acidity by using ¼ to ½ pound per square yard. Also used for turning hydrangeas blue. 10 lbs. $1.50; 50 lbs. $4.50; 100 lbs. $7.50.

ARNOLDIANA AZALEAS

In 1914, the late Jackson Dawson, then superintendent of the Arnold Arboretum, at Boston, Mass., created a splendid new type of hardy Azalea by crossing **Azalea Kæmpferi** and **Azalea Arnœna.** Of the seedlings thus produced a considerable number of them were grown at Boston from their infancy until flowering age, when the following ones of unusual beauty and vigor of growth were selected.

	Each	10	100	1000
BRIARCLIFF. A deep rich, reddish pink, identical in color with the well-known rose of this name.				
*2 in. pot-plants		$1 50	$12 50

36 to 42 in. B&B	5 00	47 50		
BUXUS KOREANA, A.A. TYPE. This is probably the hardiest of all the Boxwoods. This strain is entirely different from the above. Propagated from plants sent to us by the Arnold Arboretum many years ago. Foliage a good green both summer and winter; narrower leaves than Sempervirens; slow, spreading grower. We have been selling all our stock to growers who saw it in our nursery.				
* 2 in. pot-plants		$2 00	$16 50	$150 00

As Good As Can Be Grown

We are exerting effort to produce the very best stock that can be grown, and in our forty-two years' experience we believe we have never offered bigger values than we are offering this season. Even with the short supply of Lining-Out stock we have kept our prices at a low level. We feel sure you will be more than pleased with the stock we send you if you give us your order.

We try to secure our propagating wood from only the very best type of plants, and by doing this we can furnish you stock that should be of the best that it is possible for you to get anywhere, regardless of price.

Why not offer your customers more of the newer plants? You can make more profit than with the older varieties.

All Lining-Out sizes are marked by an *. Sizes not so marked are classed as Specimen Stock.

OUR SURE-TO-BLOOM STRAIN

When in bloom its fragrance sells it. Its small size and low price permits the customer to take it along. An ideal cash-and-carry item. Our improved strain blooms in May and again in August until frost.

Plants are solid, compact and symmetrical. The profusion of soft pink flowers attract favorable attention and the strong sweet fragrance clinches the sale.

Requires a cool house, a little room and only eight weeks to force into full bloom. Can be shipped safely throughout the winter months by freight, direct from growers, without damage.

HOLLY (Ilex)

We consider the Holly one of the very best ornamental trees or shrubs. Nothing is prettier than one of our American Hollies with great clusters of bright red berries and dark green leaves shining above the snow in winter. The nurseryman who will grow a collection of Hollies to a specimen size will have something he can sell, whether times are good or whether they are bad. There is always a demand for them, and there will be as long as any other plants will sell. We know you who took our advice five years ago to plant Holly will confirm this.

	Each	10	100	1000
ILEX aquifolium (English Holly). This is not as hardy as the American Holly (Ilex opaca) but can safely be planted from New Jersey southward. The foliage is a bright glistening green and the berries are larger than the American. A very beautiful Holly.				
3 in. pot-plants		$4 00	$35 00	
Aquifolium pyramidalis. An upright pyramidal form of English Holly and hardier than the type.				
3 in. pot-plants		$4 00	$35 00	
Aquipern femina (Aquifolia × Pernyi). This is a very interesting cross of two good varieties. Hardier than Aquifolia.				
3 in. pot-plants		$4 00	$35 00	
Aquipern, Male. Same as above except male plants.				
3 in. pot-plants		$4 00	$35 00	
Cassine angustifolia (Dahoon Holly). A beautiful shrub or small tree. Narrow, shallow-toothed, glossy green leaves and bright red leaves. Hardy in Virginia southward.				
3 in. pot-plants		$4 00	$35 00	
4 to 5 ft.	$2 50	22 50		
Ciliospinosa femina. Chinese Holly with very attractive red berries. Leaves are dark green and medium size. Growth extremely upright, usually in the form of a pyramid.				
3 in. pot-plants		$2 00	$35 00	
Ciliospinosa, Male. Same as above but male.				
3 in. pot-plants		$4 00	$35 00	
Cornuta burfordi. Another form of Cornuta, but spikes on the leaves are not so prominent and it is more hardy than the type. Berry-bearing.				
3 in. pot-plants		$3 00	$25 00	
Cornuta femina (Chinese Holly). A berry-bearing form of Cornuta. Compact pyramidal grower. Leaves dark glossy green, oblong, with 3 strong spikes at the dilated apex, and 1 or 2 on each side; scarlet berries. One of the showiest Hollies.				
3 in. pot-plants		$3 00	$25 00	
Crenata (Japanese Holly). A much branched evergreen shrub rarely to 20 feet tall; leaves crowded ½ to 1¼ inches long, lustrous green. Flowers in May and June; black fruits ripen in October and remain during Winter. Hardy in New York southward.				
*4 to 6 in. trans.		$2 00	$16 50	
*6 to 8 in. trans.		2 25	20 00	
Crenata convexa (Buxifolia or Bullata) (Box-Leaf Japanese Holly). A slow growing form of the above with glossy box-like leaves. Good for rock-gardens and other dwarf purposes. Very attractive.

HOLLY, continued

	Each	10	100	1000

Myrtifolia. A strain selected for hardiness and berry-bearing qualities. Introduced in 1935. We recommend it for trial. The leaves are long and narrow; berries colored red by October 15 and stay on plant all winter.

3 in. pot-plants $4 00 $35 00

Opaca (American Holly). An evergreen tree to 40 feet tall, with spreading branches forming a narrow pyramidal to globe-shaped head; leaves 2 to 4 inches long, with narrow spiny teeth, dull green above, yellowish green beneath; fruit red, globose, about ¼ inch across. Flowers in May and June; fruits late in autumn through winter. Hardy in Massachusetts southward. Much used for Christmas decoration.

7 to 8 ft. B&B	6 50	62 50	600 00	

The following are selections of good heavy berry-bearing types of American Holly that we are carrying under number only. Any of these numbered varieties are $4.00 for 10, $35.00 per 100 of a variety, 3 in. pot-size.

No. 1. Tall, compact. Very good.

No. 2. Dwarf grower as broad as high.

No. 3. Attractive leaf pattern. Heavy bearer.

No. 4. Good foliage. Heavy bearer. Medium size berries.

No. 5. Tall compact. Good bearer.

No. 6. Semi-pyramidal. Informal.

ILEX opaca, Arden (Arden Holly). An American Holly originating north of Wilmington, Del. and selected for its good growing habit, handsome and wonderful fruiting qualities.

3 in. pot-plants $4 00 $35 00 $335 00

Opaca, Croonenburg. The Wonderful New Holly. In a mature plant the leaves are 2½ to 3¼ inches long and 2 to 2½ inches wide, having about 7 to 9 spines of a very dark green, not having the usual yellowish tint found in the most familiar American Hollies. It bears berries from cuttings almost continuously.

3 in. pot-plants $7 00 $65 00 $625 00

Opaca, East Palatka. A cross of Dahoon and Opaca. Its evergreen leaves are practically spineless. The deep red berries are borne in heavy clusters, ripen a month or so before Opaca and persist on the tree until spring.

3 in. pot-plants $4 00 $35 00 $335 00

Opaca femina. A berry-bearing form of the American Holly. Cuttings selected from good berry-bearing trees.

5 to 6 ft. B&B	$4 00	$38 00	$375 00
6 to 7 ft. B&B	5 00	47 50	450 00

Opaca, Howard. A named berry-bearing form of American Holly Small glossy leaves, with an abundance of dark red berries in clusters.

3 in. pot-plants $4 00 $35 00 $335 00

Opaca, Hume No. 1. A vigorous grower, spreading in habit, with large, almost spineless leaves. Bears regularly and the fruit is red and of large size.

3 in. pot-plants		$4 00	$35 00 $335 00
4 to 5 ft. B&B	$2 50	23 50	225 00

Opaca, Hume No. 2. Another cross between Dahoon and Opaca. A stronger grower than East Palatka. Its berries are not so bright, however. A wonderful grower and should be included in your list.

3 in. pot-plants		$4 00	$35 00
4 to 5 ft. B&B	$2 50	23 50	225 00

Opaca, Lake City. This is a pyramidal growing type, very heavy fruiter of bright Christmas-red berries.

3 in. pot-plants $4 00 $35 00

Opaca, Maple Swamp. Good compact grower. Bright red berries.

3 in. pot-plants $4 00 $35 00

Opaca male. A male variety selected for good habit of growth and foliage to use in pollinating female varieties.

3 in. pot-plants		$4 00	$35 00
5 to 6 ft. B&B	$4 00	38 50	
6 to 7 ft. B&B	5 00	47 50	

Pedunculosa. Female. Vigorous growing Holly with perfectly smooth, dark green leaves. Its appearance is unlike the usual run of Hollies and the berries, which are bright red, hang like small cherries making this handsome Holly most unusual. Supposed to be very hardy.

3 in. pot-plants $4 00 $35 00

Pedunculosa. Male. A male type of above to use in pollinating the female variety.

3 in. pot-plants $0 60 $4 00

Pernyi (Chinese Holly). Shrub to 10 feet. Leaves crowded, with 1 to 3 rigid spines on each side, the upper pair the largest, but shorter at the terminal spiny, point, dark green and lustrous above, ¾ to 1 inch long. Fruit bright red. A handsome evergreen and the foliage is most unusual. We like Pernyi very much.

This nursery was started just 42 years ago by the present owner. We have made many mistakes but we believe our customers will agree that we have always tried to give a dollar in value for every dollar received. This will be our aim as long as The Tingle Nursery Co. stay in business. If you have any reason for complaint, tell us.

BLUEBERRIES

There has developed an enormous demand for these plants, both for fruit and ornamental purposes. If you have not been getting some of this trade you are missing some good profits. They are easy to grow and handle. Put in a small stock and let us supply you; will send to you or direct to your customers under your tag.

TAXUS (Yew)

It is only in the past few years that nurserymen in the United States have begun to really appreciate and grow the Yew. In England there are Yews more than a hundred years old, but unfortunately the English Yew (Taxus baccata) is not reliably hardy in the north, and many do not realize that the Japanese, and many forms of Media, are perfectly hardy in and around Boston, and the Japanese even in northern New England.

They are not so particular as to character of soil except that it should not be too wet, but they do appreciate plenty of good plant food. They are immune to many insect pests and plant diseases so destructive to many other evergreens.

The Yew in its many species and forms can well be used in most all places where any other evergreen will do well.

We honestly believe you will do well to plant and grow on some of these Yews.

THE PLANT HORMONE POWDER

ROOTONE
PATENTS PENDING

Just Dust and Plant
No Solutions No Waiting No Watching

We recommend **ROOTONE** because we have found it of much help to us in rooting cuttings, both in saving of time and in increased roots to the cutting. We use it on all the cuttings we plant. We know it pays us both in better roots and time saved in cutting beds.

ROOTONE is Best for Cuttings Because—

LOW COST. Can treat 30 to 50 cuttings for one cent.

SIMPLICITY. No skill is needed to apply ROOTONE. No measurements, no vials, no elaborate charts to follow, or clock-watching are needed. Just dip in dry powder and plant.

SPEED OF ROOTING. The time of rooting of cuttings is cut by ROOTONE treatment to anywhere from one-half to one-tenth of the time required without treatment.

SURENESS OF ROOTING. Cuttings that root with difficulty, such as holy, magnolia, arborvitæ, lilac, and dogwood will respond in greatly increased percentages and in shorter time.

ROOTONE is a general stimulant for plants, supplying extra hormone at times when the plant is able to use more than nature provides.

ROOTONE treatment hastens and improves the rooting of cuttings; hastens germination from seeds and bulbs, resulting in earlier flowering.

2-oz. jar $1.00; 1-lb. can $5.00 postpaid

A two-ounce jar will treat up to 3000 cuttings; pound will treat up to 40,000 cuttings.

No solution or soaking treatment is necessary. Just dip the base of the cutting in dry powder and set in the propagating bed or cold frame.

AUNT MARY'S SWEET CORN
THE SWEET CORN SUPREME

This is the most wonderful Sweet Corn we have ever grown and one grower describes it as "the best Sweet Corn in the world."

Is of the most delicious flavor and keeps a long time before becoming too hard to use. In fact, usually requires artificial heat to cure it for seed purposes.

Aunt Mary's Corn by its excellent quality, sweetness, and flavor makes a stronger appeal to the corn-loving public than any other variety and that appeal continues long after you are tired of other Sweet Corns.

Price, liberal size packets: 35c each, 3 for $1.00, postpaid.

If after growing this wonderful Sweet Corn you are not entirely satisfied we will refund every cent you paid us for it.

ROOT GRAFTS

We are again making Root Grafts of stock that is very much in demand at this time. Advise ordering before Christmas if possible as we may not be able to furnish if ordered late. We will make up and reserve for shipment at the time you want them, or will send as soon as we get them made.

Cuprinol Stops and Prevents Rusts

Wood, fabric and rope don't just rot. They're eaten up by living fungi, termites and borers. Cuprinol puts a stop to it—by an unusual principle of wood and fabric preservation. Originated abroad, Cuprinol has long been used by leading florists and nurserymen of Denmark, England and other European countries. Cuprinol is surface applied—by paint brush, dipping, spray gun or swab. Cuprinol treated material is non-poisonous to higher forms of animal and plant life. Exhaustive tests have proved that Cuprinol treated wood and fabric is non-toxic to seedlings and plants in any stage of growth.

The manufacturers of Cuprinol say the wood will last three times as long as when untreated. Get a supply and see just what it will do. "When Cuprinol goes in rot stays out."

1 gal. cans at $3.45 per gallon; 5 gal. pail at $3.35 per gal.; 50 gal. drums at $3.10 per gallon.

You Should Grow
The Rare Franklinia

(Franklinia Alatamaha; Gordonia Alatamaha)

One of Our Best Sellers

Our sales of Franklinia have increased more in the past three years than that of any plant we sell. It is one plant most every one wants once they see it and they tell their friends about it, too.

This exquisite fall-flowering tree was brought in 1777 from the banks of the Alatamaha River in Georgia to Bartram's garden at Philadelphia. John Bartram, recognizing its extraordinary beauty and value, named it in honor of his life-long friend, Benjamin Franklin.

The original grove of Franklinia trees was again visited in 1790, but from that day to this no one has seen these trees growing in the wild, though many expeditions have searched the banks of the Alatamaha for them.

Franklin's tree is beautiful in detail and marvelous in landscape effect, besides blooming at a season when few shrubs or trees are in flower.

The slender trunk and graceful branches are so muscular and sinewy in appearance that one almost expects motion as under a greyhound's skin. The bark is smooth and dark gray, with wavering lengthwise markings of lighter color.

Each twig develops at its tip a cluster of buds of graduated size, like overgrown greenish pearls. Early in August the largest of these attain the size of marbles. Then the guard petal folds back, still retaining its firm spherical form. From this shelter emerge four other petals, satiny, snowy white, elaborately frilled and pleated. The snowy, frilly chalice, three inches in diameter, holds a sumptuous mass of orange-gold stamens and breathes forth a delicate, balmy fragrance.

Each flower lasts two or three days and then drops cleanly. **There is a constant succession of bloom till hard frost.** We frequently get the unusual effect of a tree clad in crimson, autumn foliage and abundantly starred with white flowers.

The Franklinia begins blooming when not more than 3 or 4 feet high. Young trees under favorable conditions increase in height a foot or more each season. Specimens 30 feet high are known. It develops naturally with several trunks, but may easily be trained to a single trunk by removing the sprouts which start from the base.

Franklinia prefers full sun, has proved entirely hardy about New York and hardy in favorable locations about Boston. It is an especially desirable tree for the small, intimate garden, loved and lived in. It is a charming lawn tree and the grass may be allowed to grow closely about the trunk. It also thrives when planted by pools, lakes and streams. Its light elegance of form and color contrasts exquisitely with the dark green of conifers.

Glenn Dale Azaleas

The Azalea has established itself as one of the most outstanding shrubs in the whole plant kingdom, with varieties that do well in a wide climatic range. Among the recent hybrids to be developed are the Glenn Dale Azaleas, "made to order" for the vicinity of Washington, D. C. These are evergreen varieties for garden planting, capable of withstanding the variable and often severe winter climate of this area. The large flowers come in a wide and appealing range of colors. Plants grow from 4 to 8 feet tall. See page 10.
